

### **What things does city need?**

I think city need lot of jobs for people, a protection before an accident, water, electric energy, a school, a bus stop, a station and a car park.

Because people must relax, there must be some entertainment places.

### **Describe your town.**

Because my town isn't very large, there is very fresh air. In my town there is a hospital, a police station, shops, fire station, a station, a bus stop, a car park, detached houses, a factory, a park, a lake, a church, a fountain...

People will work in hospital, police station, fire station, factory, school and shops...

Because people need protection before an accident, there is a police station, a hospital, a fire station. People in town need water, electric energy and education.

Because people must transport, there are bus stops, stations and car park...

People must relax, so there is a park, a playground, a cinema, a theatre and a lake. People can relax here.
